

# Google Maps Getting Started

To begin using Google Maps, see how many of these places you can find in just 10 minutes!! You'll want to use the Search tool.

- ☐ First, find your own home.
- ☐ Find your birthplace, and if possible, the home you lived in.
- ☐ Take a quick trip to Disneyworld. Be sure to zoom in as far as you can.
- ☐ Ever been to the Louvre in Paris? Now is your chance. If you haven't already, drag the yellow man from the navigation tools to a street and start driving around the Louvre.

- ☐ Take a look at the Kremlin in Moscow, Russia. You'll notice the lack of street view here, because the little person is grayed out in the navigation tools.
- ☐ Hop over to the pyramids. Zoom out a bit. What conclusions would you draw about their location? Now find the Sphinx.
- ☐ Find one more site of interest to you. List it here:
